

## HHIC WINS 2 BRONZE MEDALS FOR WEBSITES

HHIC is pleased to announce that it won two bronze medals for [www.hhic.org](http://www.hhic.org) and [www.healthtrends.org](http://www.healthtrends.org) from the Spring/Summer 2008 World Wide Web Health Awards.

The World Wide Web Health Awards is a program that recognizes the best Web-based health-related content for consumers and professionals. The program is held twice a year with the goal of providing a "seal of quality" for electronic health information. A panel of international health information and Internet experts judges entries based on accuracy, success in reaching the targeted audience, and overall quality. In its 14th year, this web-based health awards is the largest program of its kind in the United States.

Along with our mission "to collect, analyze, and disseminate statewide health information in support of efforts to continuously improve the quality and cost-efficiency of health care services provided to the people of Hawaii", HHIC continually tries to improve the methods of providing information to the community via its website. Within the next few weeks, HHIC will launch its new and improved website. Keep checking [www.hhic.org](http://www.hhic.org) for the latest on Hawaii's healthcare data.

Mahalo,  
*The HHIC Team*
